

## Dura-Toys for Animal Enrichment

**Dura-Toys™** are plastic products designed to withstand the rough and tumble activities of zoo and marine animals. Designed with the health and safety of the animals in mind, we have a wide range of shapes and sizes to meet the demands of the smallest animals to the very largest. Our color choices range from basic earth tones that blend into the environment to bright colorful objects that contrast with the animal's surroundings. Made out of "Super Tuff" polyethylene plastics, **Dura-Toys** are non-toxic and have 5-year UV inhibitors built into the resins.

**Dura-Balls™** - Provide interesting and enjoyable playtimes for animals of all sizes. Dura-Balls come in a variety of sizes, colors, and wall thickness. Small animals can roll the smaller sized balls; others will manipulate them, while the largest animals will test their strength and endurance. Wall thickness can be specified for light use or for those tough times when elephants and rhinos want to use their massive size to show off or dominate the environment. As you might expect, the thicker the Dura-Ball wall thickness, the

heavier it is. Thick walled balls can provide a level of strength conditioning for larger animals.

Wall Thickness (inches)		Ball Weight (pounds)				
		1/4	3/8	5/8	3/4	1
Ball Size						
8"		1.8	2.6			
10"			4	6.6		
12"			5.8	9.5		
14"			8	12.9		
16"				17	20.3	
20"				26.5	31.7	
31"				60	71	90

### Dura-Treat Balls™

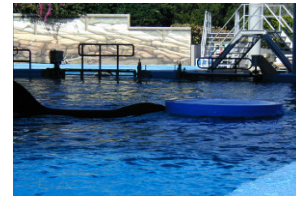

Dura-Treat balls can provide unique experiences for the animals through challenges, games, and rewards. Dispense food, fruits, bugs, treats, etc. Stashed foodstuffs or treats can exercise an animal's curiosity, inquisitiveness, problem solving skills, or simply a fun game to challenge their manipulative skills. Different size holes provide a selection of handholds, claw-holds, or tooth-holes for enterprising animals. Smaller animals may use Dura-Treat Balls to crawl through, escape into, or simply use it as a place of rest. Hole sizes can be specified to meet your requirements. Dura-Treat Balls are available in the same sizes, wall thickness, and colors as Dura-Balls.

Ball Size (inches)	Wall Thickness (inches)	Size of Holes (inches)	# of Holes
8	1/4 & 3/8	1/4	5
10	3/8 & 5/8	3/8	6
12	3/8 & 5/8	1	6
14	3/8 & 5/8	1- 1/2	6
16	5/8 & 3/4	1-1/2	7
20	5/8 & 3/4	1-3/4	7
31	5/8, 3/4 & 1	2 or 3	8

### Other Dura-Toys

**The Saucer™** – 80” diameter x 12” high and weights approximately 160 lbs. A great island for water-based animals that want to rest, congregate, isolate, claim territory, or simply use for play. The Saucer is currently being used in whale environments, where they are experimenting with its use and benefits.

**Bergs & Blocks™** – are rectangular, square, octagonal, or many-sided polyethylene objects used for animal enrichment. They are available in many sizes to provide a variety of objects that your animals will enjoy playing with, sitting, standing, or lying on for long hours. Available in ice-looking off-white natural, earth tones, or bright colors to meet your design requirements. Bergs & Blocks are used on land or water. They float or can be filled with solid or liquid materials to provide weighted objects for your animals’ use. Specify wall thickness to meet your small or large animal requirements.

**The Barrel™** – Stands approximately 36” high x 24” in diameter. Larger animals enjoy rolling, pushing, and playing with this versatile toy. Available in off-white natural, earth tones, or bright colors.
