

# LinenMaster Series II XChange Truck

## PRODUCT INFORMATION

### PRODUCT DESCRIPTION

The LinenMaster Series II XChange Truck is a new generation truck designed by laundry professionals to meet the high density transportation and infection control requirements of today's workplace.

**Lower Transportation Costs** - Fuel prices demand that more linen be shipped per truckload than ever before. The new Series II narrow 23 inch footprint permits 4-across in eight foot wide trucks. Add the increased height of the Series II for additional capacity, and fewer trucks deliver the same, or more, capacity.

**Clean Linen & Infection Control** - Use the revolutionary hinged lid with the Velcroed front closure to protect and secure contents. This option eliminates the need for awkward, high maintenance separate coat covers. Ask us about other additional options that will improve infection control for contents.

**Flexibility** - Use two shelves, or add the optional third shelf, to custom tailor your Series II loading assortments to meet customer requirements.

**Durability** - Strength and long-term durability are accomplished through unique integrated semicircular rib design and high-density linear polyethylene resin. Abuse-resistant 270-degree radius corners, no-sag steel reinforced poly-base, and anti-bulging roll top edges provide twice the strength of traditional trucks. This eliminates the requirement for any additional support bars to maintain the truck's shape.

The rolled top edge provides critical strengthening that limits cart-top expansion and a smoother surface for personnel to work with. Ergonomic hand-holds are strategically placed to provide better control of the truck when fully loaded.

**Steel-Reinforced Poly Base** - The Dura-Cast steel reinforced plastic base is tough because of the molded-in steel reinforcing bars, yet it won't rust.

**Completely Assembled** - Trucks are delivered completely assembled and production-ready so that they can go directly from your loading dock into service. These trucks will continue to perform for years in the toughest of conditions.

## SPECIFICATIONS

Overall Dimensions	60" wide x 23" deep x 72" high (with 8" casters)
Approximate Weight	162 lbs. (with 8" casters & 2 13 lb. shelves)
Average Wall Thickness	0.250
Truck Body	Made of high-density linear polyethylene resin. Drain holes in bottom.
Rolled top edges	Strengthen sides & reduce side bulging and bowing
Built-in External Structural Ribs & Corners	Integrated external side wall ribs and corners stiffen truck walls & prevent wall damage
Ergonomically Designed	Helps reduce worker-related injuries
Optional Engraved Logo	Optional engraved logo of your choice molded into truck body
Molded-In Date of Manufacture	Facilitates accurate asset management
Reinforced Hand-hold Cutouts	Provide secure control of truck
Polished Body & Smoothed Edges	Professional appearance & smoothed edges reduce worker injuries
Two Xtra-Light Shelves	Xtra-Light 13 lb. cream colored shelves. Shelves are made of a specially formulated high density polyethylene resin
Optional Molded-in Logo	Optional molded-in colored logo on each shelf
Top Locking Shelf	Top shelf locks in upright position for easier access to truck contents
Interlocking Shelves	Shelves interlock when in bulk upright position to secure truck contents
Optional Pull Bar	Stainless Steel Pull Bar on swivel caster side
Steel-Reinforced Poly-Base	Made of high-density linear polyethylene resin with 2 enclosed internal steel reinforcement bars that act as torsion bars and won't rust
Casters	Choice of sizes and configurations of swivel & rigid casters with thread guards
Bolt-through Caster Mounting	Bolt-through caster mounting ensures that truck body base and casters are one integral unit with strength to support heavy loads
Optional Tow Plates	2 multi-holed black steel tow plates. When tow plates are ordered, truck body has molded cutout so that tow plates don't protrude beyond body wall.
Completely Assembled	Ready for immediate deployment & service

Dura-Cast Products, Inc. is Florida's premier rotationally molded plastics manufacturer. Our products are used around the globe. Dura-Cast is a privately held corporation, founded in 1973, and purchased by its current owners in 1987. We manufacture: open top, vertical, cone bottom, and horizontal tanks; marine and general purpose tanks; material handling; rigid polyliners; refuse containers and agriculture products. Dura-Cast is a contract manufacturer for customer owned and designed products.
