

Rotomolding plastics
for the future.

Barrel Topper

This topper was specifically designed to fit the top of standard 55 gallon plastic and steel drums, providing you with a secure, on-site containment option. The barrel topper can be easily installed by one person and provides a convenient pump-out and cleaning solution. Because it is molded with polyethylene resin, it won't rust or corrode, giving you a durable and secure storage option.

Bolted barrel rings come standard, and you can customize the topper with an optional lever or lock clamp to best suit the needs of your facility.

Contact us today for durable storage solutions that work for you!

*Optional Lock Clamp for Barrel Ring.
Padlock not included.*
