

LinenMaster 48 – Secure Bulk Truck

PRODUCT DESCRIPTION

The LinenMaster 48 - Bulk Linen Truck is now available with hinged Drop-Down Front Door, and either a Single-Piece Top or a Two-Piece Split Top. A front door and top combination can be secured to provide tamper resistance. One-piece Front Enclosures keep contents inside the cart. The trucks are fully assembled.

Drop-Down Front Door

The hinged Drop-Down Front Door secures contents when closed and drops flat against the cart when opened, permitting easy front access to cart contents.

Single-Piece Top

Single-Piece Top keeps dirt out and contents in. Security options provide tamper resistance, and the top slides back to provide access to the contents and to open the front door.

Two-Piece Split Top –

The Two-Piece Split Top permits access to the top area by easily opening each of the split top panels to the sides. Security options provide tamper resistance. You can place the secured cart directly against a wall and still access the top of the cart without needing to move the cart.

LinenMaster 48 – Secure Bulk Carts

Front Closure

For those times when contents must not fall out of the cart and a top isn't required: use a Front Closure. Made of impact resistant linear polyethylene, the Front Closure simply slides into the cart's front "V" opening. Cart contents can't fall out. Front Closures are available in colors that match or contrast with cart colors.

Specialty Carts

Specialty colors, mold-in graphics and optional features customize our standard carts to meet your unique requirements. We made the LinenMaster 48 more durable, stronger, and more ergonomically effective for today's workforce, more efficient to work with, and more pleasing in appearance. This is a bulk linen truck that you can be proud of and one where you can confidently display your molded-in logo for all to see.
