

LAUNDRY TRANSPORTATION EQUIPMENT

Dura-Cast continues to respond to requests from laundry managers who want innovative products that solve their problems. Equipment for handling tunnel washer cakes was presenting a problem.

The Laundry Managers' Problem

The high number of incidents of worker back and strain-related injuries while separating sheets from a round cake in a rectangular cart.

The Equipment Problem

Traditional rectangular carts distorted the round cakes and created pressure points on the cake. When operators tried to separate the sheets, they were required to exert a lot of force to dislodge each sheet.

PRODUCT DESCRIPTION

The LinenMaster Kake Kart is a new generation cart designed from the inputs of laundry professionals to meet the ergonomic standards for today's smaller workforce.

The Dura-Cast Design Team designed the Kake Kart to ease arm and back stress-related injuries for operators working with linen cakes. Tunnel washers produce round "cakes" that are loaded into a cart for transportation and separation. The Kake Kart is shaped like the round linen cakes produced by tunnel washers. Because it doesn't distort the shape of the load, linen cakes can be separated more easily. Load distortions caused by rectangular carts result in excessive strain on operators who must separate the load. The round cart permits the load to retain its shape, eliminates load distortion, and allows operators to separate the load with reduced arm and back stress.

Strength and long-term durability are accomplished through the integrated rolled top edge. The inside diameter of the cart matches that of the cake. Four swivel casters permit easy movement and the tapered sides allow the carts to be nested for small-footprint shipment or floor storage. Impact resistant linear polyethylene resin ensures that your cart will continue to perform for years in the toughest of conditions.

FEATURES	FUNCTIONS / BENEFITS
New generation linen cart	Lower costs, better production, and longer asset life
Ergonomically designed	More productive for today's workforce, helps reduce worker-related injuries
Impact resistant linear polyethylene resin	Toughest material used in trucks today, scratch and gouge resistant
Rolled top edges	Reduces truck bulging and bowing
All edges are polished and smoothed	Professional appearance, eliminates sharp edges
Casters	Order with casters of your choice

LinenMaster Kake Kart

SPECIFICATIONS

Overall Dimensions	52" diameter x 37" high (with 3" casters)
Inside Dimensions	48" diameter x 32" deep
Rolled Top Edge	2"
Manufacturing material	Impact resistant linear polyethylene resin
Drain Holes	
Base	Painted plywood
Standard Colors	#71 Light Blue, #14 Marine Blue, #26 Tan, #08 Hunter Green, #01 Black, #13 Brown, #04 Dark Gray, #15 Light Gray
Optional Colors	#07 Red, #16 Yellow, #24 Orange, Custom colors upon request
Optional:	
Casters	3", 4", 5", and 6" swivel
Molded-in Custom Logo	
Custom Stenciling
